

# LASER TAG

Everybody loves Hallprint tagging, right?

# Drawbacks....

One simply does not use superglue without gluing the fingers together..

**I KNOW** these were tagged!

Bee tag protected by Superglue- still attached after nearly 4 years- but note erosion around the Superglue island

# Comparison of laser, laser+superglue, Hallprint, superglue dot, and “incognito”

# Drawbacks....

It costs HOW MUCH????

About \$9,200

Be the first on your block!

Recapture Neosho mucket (after two years) showing Hallprint and laser tags- note discoloration of Hallprint (formerly yellow). It slipped later during handling.
